## **ABOUT ME**

I'm a hard worker and I'm responsible. I'm also a good communicator. I've got four years of commercial experience under my belt. I'm on the lookout for a company where I can level up and grow. I'm looking for interesting projects with well-developed processes and nice colleagues. I'd love to meet you!

## **PROFESSIONAL EXPERIENCE**

### **Frontend Developer** **Reviro, Bishkek, KGZ**

**April 2023 - Present**

A company specializing in the development of various SaaS products.

— Worked on a crypto-fiat exchange application as an outstaff (admin-user applications, the client is a leading investment company in the Kyrgyz Republic), specifically:

- product launched: helped design the application architecture; together with PM and the Lead, I built processes in the team;
- developed MVP: took responsibility for the frontend, relieving the lead; made the main functionality (wallet integration - Fireblocks, withdrawal, deposit, exchange, transaction history, applications for admins);
- developed until the “pre-final” version: most of the features - 80% (order book & others); helped with transaction receipts and emails on backend;
- helped the lead: onboard people, code review, planning & other interesting things

— Team started with me + the Lead + PM + BA, in 10 months we gathered: front + 2 back + QA + PM;

Stack: Next.js, TypeScript, TanStack Query, Zustand, Context

— Worked on a taxi service admin dashboard. The client strives to become one of the leaders in the taxi services market;

— Helped with migration & refactor: improved tables, inputs, forms, performance (by 30%: split code, refactor). Team consisted of 20 people;

Stack: React, TypeScript, RTK, RTK Query

— Working on a mobile banking as an outstaff for a famous bank.

— Due to lack of time before the release, I am helping out with everything: new features, new IE application, Liveness & etc; improved performance by 30% (split code, refactor). Team consists of 5 people: 2 front + 2 back + PM + bank folk;

Stack: React Native, TypeScript, RTK, RTK Query

### **Frontend Developer** **CRM Technologies, Bishkek, KGZ**

**January 2022 - March 2023**

A SaaS company focused on automation and contact center software.

— Worked on a couple projects starting my career.

— Developed Google Wallet loyalty card builder application. Took part in projects' frontend architecture improvement. Implemented dashboards and graphs for a local billing system.

Stack: React, TypeScript, Redux

**Education:** a Bachelor's degree in Computer Science - Ala-Too International University, KGZ. My English level is B2, fluently speak in Russian and Kyrgyz languages.
